

Calsoft Labs partners with Precision Technologies to enter the Gaming Business

Pleasanton, September 21, 2007- Calsoft Labs today announced the formation of a partnership with Precision Technologies, a leading provider of engineering, consulting and implementation services based in the US for Linux based Adobe Flash projects in the Gaming arena. Calsoft Labs, a wholly owned subsidiary of [California Software Co. Ltd. \(Calsoft\)](#) based in Chennai, India has over the years assisted start-ups and leading technology firms alike and introduced innovative products to the market rapidly and cost-effectively.

This partnership will give Calsoft Labs more engineering experience in the expanding Linux market. Precision Technologies' experience in the field of Gaming will help CALSOFT work with industry leaders on the next generation of Gaming machines. Precision Technologies, an Adobe licensee with extensive Linux expertise, will also work with Calsoft Labs in other areas on Linux-based Flash projects. This partnership will enable Calsoft Labs to offer Adobe Flash based embedded services to the manufacturers of Gaming Machines to meet the growing the world-wide demand.

“We understand the importance of strong partnerships to deliver complete and tailored solutions to our customers in the Gaming sector. This partnership with Precision Technologies will provide added value to our customers and will open up a new market for us”, said Mr. S (Sam) Santhosh, CEO and Co-founder, Calsoft Labs.

Mick Martinek, President, Precision Technologies added, “We are very excited to enter into this partnership with Calsoft Labs. This relationship will provide us with an exceptional opportunity to leverage our core strengths and increase our overall market presence.”
